

# CellBase Versions

CellBase uses [semantic versioning](#):

	Features might include...	Backwards compatible?	Example
Major release	Changes to the data model, or physical database schema	NO	5.0.0
Minor release	Additions to the API. updates to data parsers, etc	Yes	5.1.0
Patch release	Bug fixes	Yes	5.0.1

Traditionally a new CellBase version is released a few times a year.
