CellBase Versions

CellBase uses semantic versioning:

	Features might include...	Backwards compatible?	Example
Major release	Changes to the data model, or physical database schema	NO	**5**.0.0
Minor release	Additions to the API. updates to data parsers, etc	Yes	5.**1**.0
Patch release	Bug fixes	Yes	5.0.**1**

Traditionally a new CellBase version is released a few times a year.
