

Web data portal

The HGVA site can be easily accessed through your web browser using its web application:
<http://bioinfodev.hpc.cam.ac.uk/web-apps/hgva/#home>

Table of Contents:

This web application allows users retrieve information about the variants stored in any of the projects by using a simple search box. Results of the search are summarised using the Integrative Variant Analysis (IVA) application which includes detailed information about the variants and allows filtering using multiple parameters.

For further details on how to use the Variant Browser please, refer to the tutorial at [Using the Web Variant Browser](#).
